

HOW TO USE LS 2011 PATCHER ver. 3.0.0.2 [ENG]

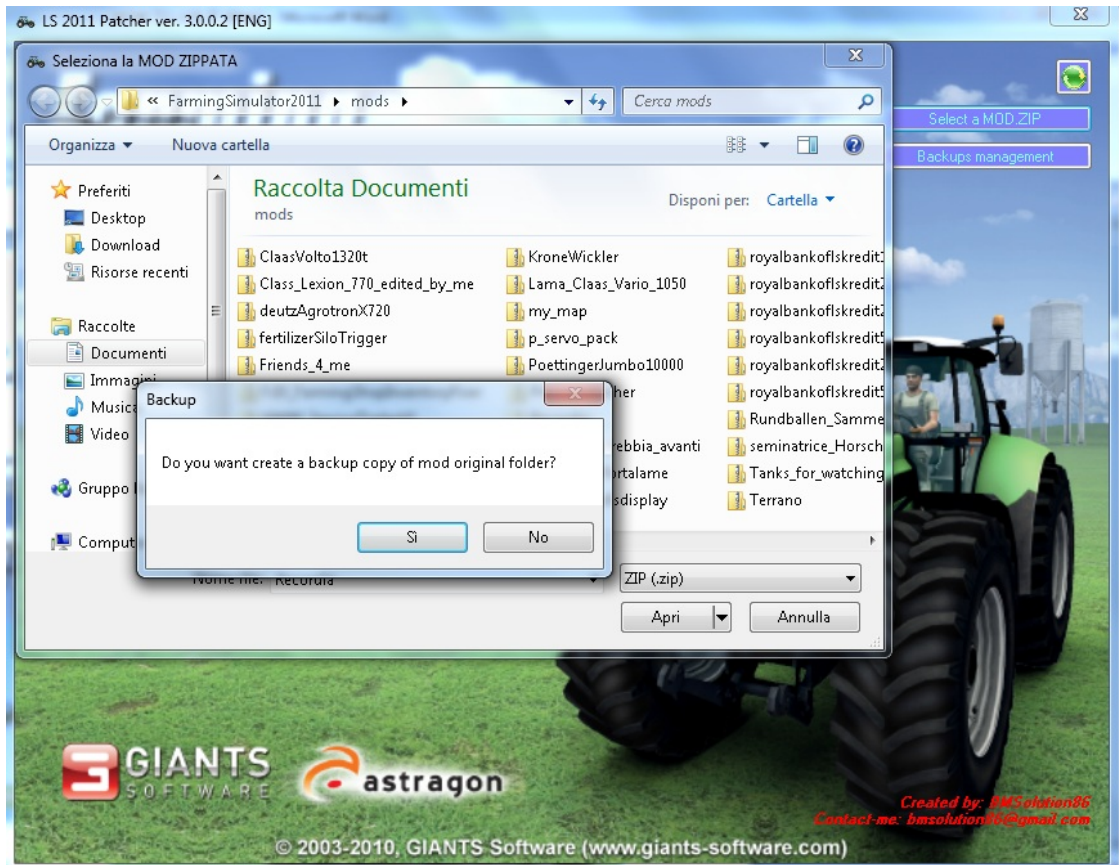

1. Run the application and click on button “Select MOD.ZIP”.

2. A folder dialog will be opened to select the mod. So, you search it in the saved folder.

3. So click the button “Open”. If the decompression and the search for references to be successful then you are asked to make a copy. Then choose how to proceed.

4. Select what the type is your mod to menu.

5. Select what you want edit (red arrow). Then click on “Edit” (green arrow).

6. Enter the price (in this case) that you want (white arrow). You confirm clicking on INVISIBLE button that located it on icon GIANTS SOFTWARE (blue arrow). You will be showed a message for successful.

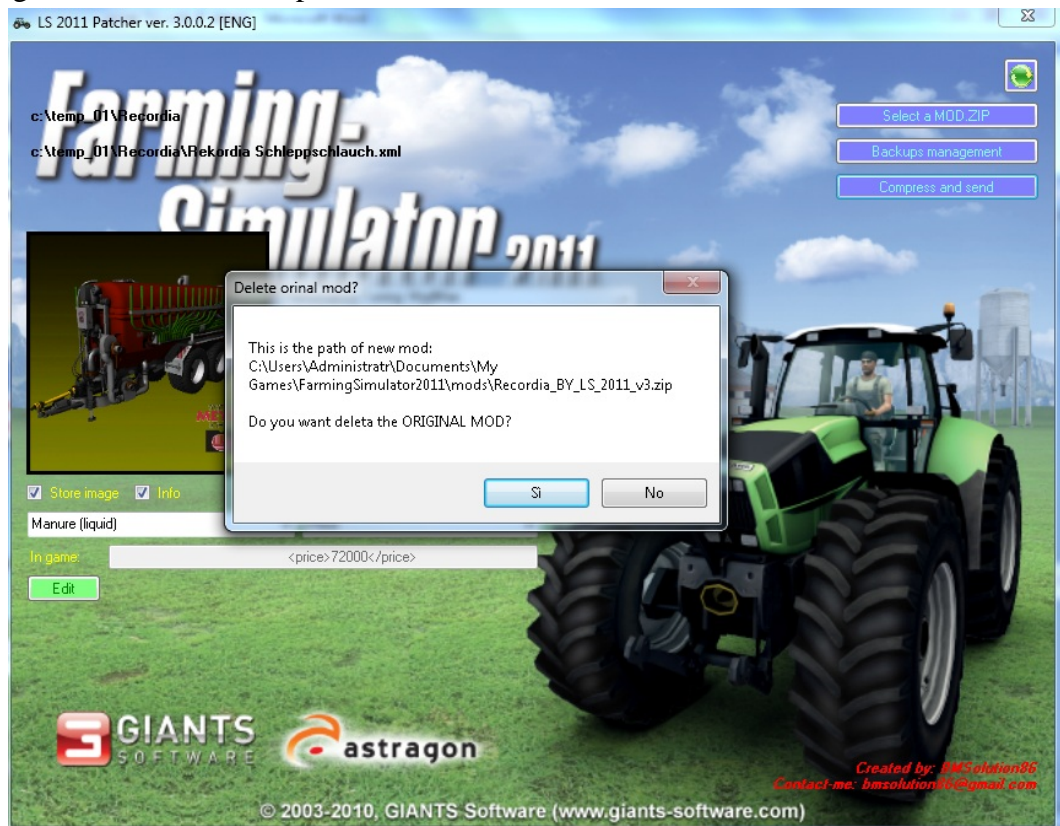

7. You can continue whit select that you want edit from apposited menu repeating the 6 step fo this guide, or you can generate the new mod clicking on “Compress and send”.

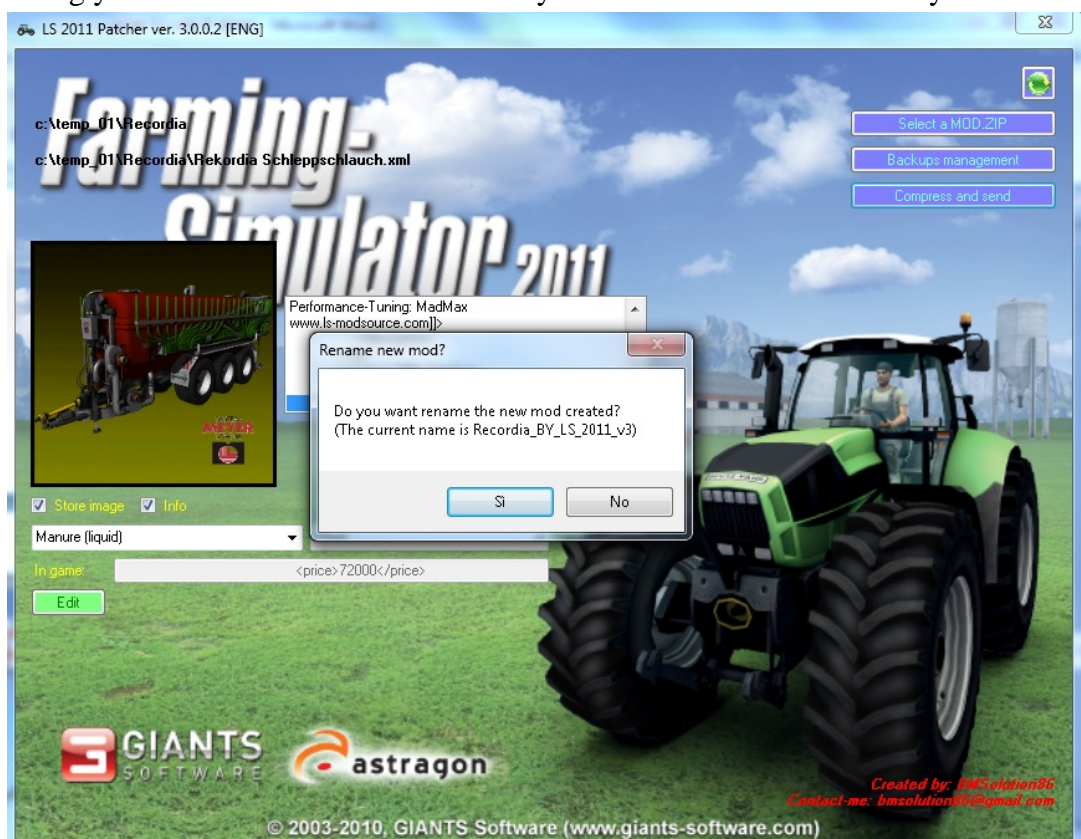

8. Select where you want save the new zipped mod (it's preferable put it in the mod folder of games).

9. Then you have clicked on “OK” and there appears a message which describes the full path of your new mod and asks us if we want delete the original file that you have edit. This feature was added because if you are working directly in the mod folder of the game are created two zip files. With this function you can delete the original file and keep what you have edited by clicking on "Yes" or reject by clicking on the "No" and keep both the mod.

10. After choosing you will see a window that allows you to rename the new mod if you want.

11. If you click on “Yes” A screen will show where to insert the new name of the mod that you have created.

12. Enter the name of the new mod WITHOUT BACKSPACES and SPECIALS CHARACTERS. In this case the name has been entered without space but could also be "Recordia_Changed". Then click "OK" and you will see a message renaming performed.

13. Click on "Change mod" to clear all fields and references of the program and start to edit another mod by following step 1 of this guide.

ENJOY!!!
